## WORK HEALTH SAFETY & ENVIRONMENT

Hall Construction Group prides itself on being proactive and calculative when it comes to knowing and managing work health safety and environmental risk. With a fully compliant WHSE management system operating across every work site, we value communication, consultation, continual improvement and full team commitment to safety and zero injuries. In the same spirit, we commit to minimising the impact our activities have on the environment with a focus on carbon and work place pollution abatement.

## INDUSTRIAL RELATIONS

Hall Construction Group operates under a Collective Agreement which is DEEWR Code Compliant. We endeavour to maintain a harmonious relationship with all key stakeholders in our business and work hard towards ensuring a balance between productivity and upholding a safe working environment and collective agreement terms and conditions.

# WHY CHOOSE US?

## WHY CHOOSE US?

Whilst most forms of concreting have remained unchanged, areas such as structural formwork, post tension and suspended slabs, detailed and deep excavation works require specialised skills. HCG is specialised in all of these areas and can provide a full end to end service for most commercial and civil construction projects. By concentrating on these areas with our proven expertise, HCG has become a market leader. HCG can provide a complete range of solutions to meet your structural building requirements.

Hall Construction Group is the concrete construction company of choice for many builders and project managers in Melbourne and Regional Victoria. They find HCG a company they can trust and rely on to remain on schedule and within budget.

# SERVICES

## SERVICES

Our team has extensive hands-on experience in the concrete construction, formwork, civil construction and earthwork fields.

We employ only the highest skilled trades people in Melbourne, ranging from Concreters, Carpenters, fully licensed Machine Operators and an Administrative support team including a Senior Estimator, Quantity Surveyor and a Procurement and Supplies Manager.

**BULK AND DETAILED EXCAVATION** – with an extensive fleet of Excavators ranging from 23 ton to 1.5 ton, no job is too large or too small when it comes to digging and removing spoiled earth from site.

**FOUNDATIONS** – we pride ourselves on possessing a keen eye for detail during the crucial phase of setting out and constructing the foundations of the project. We know that our work activities will not only be depended upon by other trades, but also the owners and occupants for many years to come.

**STEEL FIXING** – HCG is acutely aware that the structural integrity of any building is dependent on the steel infrastructure of the concrete works. Our steel fixers are specialised in their field and will never compromise the quality and quantity of steel used.

**CONCRETING & SHOTCRETE** – our Concreters are expert in concrete placement and finishing. In the knowledge that the finished product will need to withstand the test of time, our Concreters take pride towards ensuring their workmanship leaves a lasting impression of quality and durability.

**SITE COORDINATOR** - Much like running a company, our Site Coordinators are in charge of supervising all aspects of a construction project. This involves communication and coordination with the builder, architect and other trades. Site Coordinators also action safety and quality control policies amongst HCG employees.

**SITE FOREMAN** – Working onsite fulltime, our Site Foreman oversee all field operations to ensure that work is in compliance with construction plans and on schedule. Qualifications include carpentry or equivalent and a minimum of 10 years commercial construction experience.

**FORMWORK** – with over 25,000m<sup>2</sup> of formwork fully owned and maintained by the group, HCG is able to tackle multiple projects simultaneously without depending on formwork suppliers.

**CARPENTRY** – our team of qualified carpenters are representative of the best tradespeople in Melbourne and well versed in all elements of concrete superstructure works.
